

**MAINS
PRESSURE**
Enamel

Rinnai is pleased to announce that in November 2017 we are launching our new Mains Pressure Enamel Indoor / Outdoor range. This range is the latest addition to our completely revised and improved electric hot water cylinder collection.

This range will replace our existing Hotflo™ Mains Pressure Enamel range and all orders for Hotflo™ 135/180L 515mm diameter cylinders will be fulfilled using the new product from November 2017. Please note that the 215L, 270L, 340L cylinders will remain unchanged dimensionally but will reflect our new branding as we receive new stocks. We will also introduce a new 90L cylinder to the indoor/outdoor range.

During this changeover period, we will be running down the stock of the current Rinnai Hotflo™ Cylinder range 135/180 x 515mm diameter and we expect to have a short period of no stock for this range.

For more information on this new range please email us at marketing@rinnai.co.nz

Kind Regards,
The Rinnai Team

Meet the New Line up

We have been making incremental improvements to our cylinders over the last few years and some of these innovations have been:

- Development of a unique, environmentally friendly foaming formulation with zero ozone depletion potential and ultra-low global warming potential.
- Design enhancements and inventions that minimise heat loss and maximise efficiency.
- Optimisation of manufacturing processes.
- Completion of a purpose built hot water test laboratory which has allowed us to optimise the efficiency of our new foam and minimise heat loss. We have undertaken a comprehensive programme of heat loss tests, under these laboratory conditions, to refine and optimise the specification of this new range.

So, with nearly 200 different variations of cylinders, not only do Rinnai have NZ's largest range of cylinders, we will also have New Zealand's most innovative, fully MEPs compliant range that is completely NZ designed & engineered.

Introducing The Plumbers Promise

All of our Hot Water Cylinders are backed by our revised warranty –

The Plumbers Promise

**Our
Plumbers'
Promise**

To the plumber:
Rinnai Cylinders are covered by warranty. If there's a problem within the first year we'll supply the part and cover the cost of your time to do the job. After the first year refer to the warranty details for this specific cylinder at rinnai.co.nz/warranty. Just call us on 0800 Rinnai and quote the model number.

Product Details
